

DIRECTOR OF INSTITUTIONAL RELATIONS

TOTOK SULISTYANTO

With 35 years of experience in energy research and conservation, Totok Sulistiyanto has played a key role in advancing energy efficiency in buildings and industries across Indonesia and ASEAN. Holding a master's degree in engineering science from Melbourne University, he has led PT. Narama Mandiri as Director since 2010 and has spent over two decades running a mechanical, electrical, and energy consulting firm.

His expertise spans a wide range of green building and energy efficiency initiatives, including energy audits, building energy standards, and efficiency design codes. He has led policy development, research, and demonstration projects in collaboration with international organizations such as FCDO UK-PACT, UNDP, C40 Cities, Danish Energy Agency, South Pole Carbon, GFA Consulting, GBPN, and USAID. His work has contributed to shaping Indonesia's energy efficiency framework, influencing both national policies and industry practices.
