Smart Home

Smart home technology allows you to use energy more efficiently. Enjoy superior comfort, convenience, and energy saving through the intelligent control.

8

Wiser

Control your electrical devices and lighting at home as simple as running the mobile application.

11

AvatarOn

Bring your electrical devices to the next level with the most fashionable switches and socket which can be matched with various interior design style.

14

KNX

Upgrade your lifestyle and perceive the luxuries by installing the most high-quality design home control device

15

C-Bus

Optimize your home and building energy's consumption through sophisticated and simple devices.

Other Wiring Devices

ULTI

It blends two contrasting geometries to create modern simplicity of electrical devices new era. Ring-shaped LED locator will glow in the dark to guide you to your switches.

ULTI collection is a definition of beauty and ingenuity technology.

NEO

Arranged horizontally switches and socket)

ZENcelo

The first flat switches and socket in the world

Pieno

Perfect combination of beauty and reliability

PowerTag

Give your business a **competitive edge** with PowerTag wireless energy sensors

With PowerTag™ , you can add innovation to any project with one simple action. Even in panels where space is at a premium, you can easily tag circuit breakers to help your customers reduce costs and improve efficiency.

As a connected product, PowerTag is a key part of EcoStruxure™ Power – Schneider's IoT-enabled, open, and interoperable architecture. And a small-but-impressive solution your customers will appreciate.

Monitor it. Secure it.* Tag it.

16

Hotel Room Controller

Improve your guest satisfaction and bridge the gap between guest rooms and the rest of your hotel.

17

ARGUS-Occupancy Sensor

With ultrasonic and infrared detection, Argus will bring light and dark within a space by detecting sound and movement.

Discover more high-tech, chic, and modern electrical devices for your smart home and building.

Smart Home

Enjoy superior **comfort, convenience and energy savings** through the intelligent control of lighting and electrical devices.

Benefits of a Smart Home

No matter what level of automation you choose, you and your family will enjoy a whole range of exciting benefits.

Comfort:
Lights, entertainment, audio and climate. Dramatically alter the ambience of any room with push of a button, giving you more time to sit back and enjoy it.

Convenience:
Streaming your everyday life by automating routine functions, smart home technology creates a self-sufficient environment, saving you time to do more of what you want.

Control:
Configure your home to suit your lifestyle. Whether you're just after basic control or are looking to invest in whole home integration, smart home technology greatly improves the usability and functionality of any home.

Automating your home with smart home technology can be as simple as installing a single motion sensor, dimmer, or timer, or as advanced as integrating multiple home technologies into an intelligent control system.

With control via smart devices, the possibilities are endless.

Energy Efficiency:
Smart home technology allows you to use the energy in your home more efficiently. Providing information about how much energy you're using, smart home technology makes it easy to make real time changes to your consumption.

Future Proof:
As smart home technology becomes more and more prevalent, properly wiring your home allows you to easily accommodate and incorporate advances technology.

Add Value:
An investment in smart home technology can add value to your home. With a multitude of lifestyle benefits, smart homes are attractive to future buyers.

Product specification:		
	Passive infrared sensing	Passive infrared sensing
Reference	CCT570005	CCT570003
Description	ARGUS standard mini PIR Sensor	ARGUS standard 2 Channel PIR Sensor
Range Detection (installation height: 2,5 m)	6 m (diameter)	7 m (diameter)
Load 1 (maximum)	Fluorescent Lamp	1.000 W
	Halogen Lamp AC	900 W
	Halogen Lamp LV	250 VA
	TL Lamp	200 VA
Energy Efficiency Lamp	80 VA	80 VA
LED Lamp	100 W	100 W
Maximum Ballast Capacity	25 µf	14 µf (10 A)
Load 2 (maximum)	HVAC	5A for ≤ 250 VAC, cos = 1 5A for ≤ 30 VDC 1A for ≤ 250 VAC, cos = 0,4
Voltage	230 VAC, 500 V 50Hz	230 VAC, 500 V 50Hz

Product specification:			
	Dual technology sensing		
Reference	CCT551011	CCT551012	CCT551011
Description	ARGUS Presence Dual-Tech (PIR & Ultrasonic)-1 channel	ARGUS Presence Dual-Tech (PIR & Ultrasonic)-2 channel	ARGUS High Bay Sensor (High Frequency)-2 channel
Range Detection (installation height: 2,5 m)	PIR: 8 m (diameter) US: adjustable up to 10 m x 16 m (oval shape)	PIR: 8 m (diameter) US: adjustable up to 10 m x 16 m (oval shape)	14 m (diameter) 10 m (diameter) at 6-10 m height
Load 1 (maximum)	Fluorescent Lamp	2.000 W	2.000 W
	Halogen Lamp AC	1.000 W	1.000 W
	Halogen Lamp LV	1.000 VA	1.000 VA
	TL Lamp	900 VA	900 VA
Energy Efficiency Lamp	80 VA	80 VA	80 VA
LED Lamp	100 W	100 W	100 W
Maximum Ballast Capacity	100 µf	100 µf	100 µf
Load 2 (maximum)	HVAC	—	5A for ≤ 250 VAC, cos = 1 5A for ≤ 30 VDC 1A for ≤ 250 VAC, cos = 0,4
	Voltage	230 VAC, 500 V 60Hz	230 VAC, 500 V 60Hz

Levels of Smart

Choose what you want to control in your home. Whether it's individual control, or a fully integrated system, there's something to suit your lifestyle and budget.

Benefits of a Smart Home

- Lighting
- AV/Entertainment
- Audio
- Ceiling Sweep Fans
- Windows, Curtains and Blinds
- Irrigation
- Climate
- Energy Management
- Security/Intercom
- Pool and Spa

Wiser helps you redefine your **comfort zone**

Wiser offers intelligent integration of home control devices such as:

- Lighting and curtain control
- Variable Refrigerant Flow (VRF), Heating, Ventilation, and Air Conditioning (HVAC) and floor heating control
- Motion, water leakage, door/window status, lux levels and temperature/ humidity sensing
- Video door entry system

Wiser is an ideal partner for private homes, providing remote automation, control, and monitoring,using on-wall and behind-the-wall products. It provides a unique experience of smart control over many facets of residential life. With the Wiser by SE app, you are all set to embark on an enriching smart home journey.

If you want to have a most cost-effective solution without Wiser ZB/IP Gateway, you can also enjoy the lighting and curtain control by creating moments through E-mode commissioning for the freelocate.

Comfortable and user-friendly

Wiser is an intelligent home control solution offering a plethora of functions and makes daily life easier. With Wiser, the entire home can be controlled as usual with switches or through a mobile app. One or more functions such as HVAC, TV, VRF, or floor heating equipment control can be effortlessly achieved through a single tap or automatically.

Connected devices for a **smarter home**

Wiser app

Wiser is a connected home technology that makes your home life richer, without making it more complicated.

High-quality products that comply with international standards: CE, RoHS.

Hotel Room Controller

Bridge the gap between guest rooms and the rest of your hotel

Drive further energy and operational efficiency by integrating guest rooms with your property management system (PMS), building management system (BMS), or our Guest Room Management System (GRMS). Connecting the guest room with other systems provides you with more visibility, functionality, and control, while enhancing the guest experience. The main components of our guest room management solutions include the following:

SE8000 Series Room Controller provides occupancy-based HVAC control. Integration with the PMS allows the hotel Operator to:

- Send welcome messages on arrival.
- Set guests' preferred language, temperature, etc.
- Send targeted commercial messages to rooms.

Hotel Room Controller (HRC) manages multiple lighting circuits, curtains, DND/MUR, bedside panel, and tablet applications in the guest room. It aggregates data from all subsystems and devices in the room, and sends it to the GRMS and PMS.

Guest Room Management System receives data from the HRC and provides centralized visibility and control of guest rooms and other services like BMS, PMS, and door lock. The GRMS enables the Operator to see occupancy and DND/MUR status, monitor and control conditions in the room, and troubleshoot problems remotely.

EcoStruxure™ Building Operation (formerly known as StruxureWare Building Operation) is user-friendly building management software for optimized building performance. Built upon open standards and end-to-end cybersecurity, it integrates and facilitates data exchange from the HRC, GRMS, PMS, and door lock system to improve staff productivity, reduce guest complaints, and enable superior operational efficiency and guest room functionality.

Meet Wiser

Wiser gives you unparalleled control over your home's critical needs, delivering comfort, convenience and peace of mind. For a simple and intuitive connected home experience.

Configuration

C-Bus®

C-Bus eDLT Wall Switch
Home control should be both simple and sophisticated. With a customisable display and contemporary design, the C-Bus e DLT wall switch not only provides user-friendly control of your C-Bus system, but also complements any modern interior.

Saturn Wall Switches
Wall switches should enhance your home interior. Choose a wall switch that complements your style with this diverse selection.

C-Bus Touch Screen Controllers
Streamline your home with the C-Bus Touch Screen Controller and control your C-Bus system from one central location.

Infrascan Indoor Motion Sensor
Ideal for use in a separate toilet, the infrascan works as a handsfree light switch and is perfect for those middle of the night trips.

C-Bus Network Automation Controller
Optimize your building's energy consumption with the C-Bus Network Automation Controller (NAC). Powerful, integrated solution on open, scalable devices and applications, that allows multiple standards and protocols for building automation and energy metering to be seamlessly and efficiently integrated.

KNX Multitouch Pro

The new KNX Multitouch Pro stands out thanks to its exceptional design. Its function control is similar to that of a smartphone or tablet. Swiping is used to achieve simple and intuitive switching between eight possible main functions. The unit offers a choice of two interface designs, vertical or rotary, which can also be used in combination.

Special product features

- Proximity sensor: Display illumination is activated automatically upon approach.
- Gesture function: controls one previously defined function using a particular gesture.
- Customizable screen saver.

KNX Push-button Pro

High-quality design and intuitive operability - the new KNX Push-button Pro concentrates on what is essential.

The individual touch-sensitive zones on the sensor cover are shown using illuminated function icons that shine through the translucent surface and emphasize the high-quality look of the new push-button.

The sensor is available in all the System Design colors.

Up to four light, shutter and scenario functions can be controlled using the KNX Push-button Pro. This means that, in combination with the KNX Multitouch Pro, it offers the perfect solution for intuitive and flexible room control at home or in commercial spaces.

AvatarOn

Push Your Imagination

With AvatarOn, your interiors can evolve along with your needs. Whether you are undergoing a quick refresh or an all-out renovation, AvatarOn is ready to help you switch things up.

The range includes six fashionable, classic appearances, which can be matched to your hotel's unique style. You can also design your own cover for themed events or festivals being held at your hotel's restaurant or function room.

Additionally, with one-hand cover removal and easy-mount covers, customizing rooms is quick and easy.

Examples of personalized covers

Explore a variety of functions

Not only endlessly customizable, but also ingeniously functional, the AvatarOn range boasts a broad selection of functions, from switches and sockets, to connection units and accessories. So you can easily find a device for any of your home needs.
